

ProNet Group Commerce Suite

ProNet Group Commerce Suite provides an integrated suite of web-enabled business applications designed specifically for buying groups to streamline and automate manual processes, providing significant operational cost savings and a higher return on supplier rebate incentive programs. Several national groups utilize ProNet today...

Procurement Network Solution

ProNet Group Commerce Suite is a web-enabled collection of six (6) integrated Microsoft .NET-architected applications, which will enable your buying group to better leverage the purchasing power of your members to maximize the value of preferred supplier programs. The suite can transform your buying group into a tech-savvy procurement network (ProNet), which qualifies your members for deeper price discounts, greater rebates, better terms, and other program incentives only available to B2B-enabled organizations.

Provide your group a "profitable" business & technology advantage.
